

WHAT IS CLAIMED IS:

1. An indicator of size, etc., to be attached to an attaching part which is formed on a clothes hanger and exposed to the outer surface when clothing, etc., is hung, comprising:  
5 a flexible sheet part;  
fixing parts formed close to both ends to be fitted with the attaching part; and  
indication sections indicating a size, etc., printed on a plurality of points which become outer surfaces when the  
10 attaching part is fitted with the fixing parts.
2. An indicator of size, etc., to be attached to a clothes hanger as claimed in claim 1, wherein V-shaped or U-shaped grooves are made in the flexible sheet part to form valley folding hinges, and the sheet is folded inward at the valley  
15 folding hinges, whereby fixing parts close to both ends accurately face each other without deviation.
3. A clothes hanger attached with an indicator of size, etc., comprising:  
an attaching part formed on the clothes hanger so as to  
20 be exposed to the outer surface when clothing, etc., is hung;  
and  
fixing parts formed close to both ends of the indicator by folding an indicator including indication of size, etc., on surface portions of a sheet part,  
25 wherein the fixing parts are fitted with the attaching part, whereby the indicator is attached to the attaching part of the clothes hanger.
